

What is DATA SOLUTIONS?

DATA SOLUTIONS is a real-time data tracking service which enables our customers to harness testing data for real-time competitive advantage.

Enjoy a new digital experience. DATA SOLUTIONS and its customized applications provide you with full connectivity and delivers all the essential information for the management and maintenance of your equipment as well as UUT testing results. Reduce complexity and gain advantages through transparency and collaboration. Join us in the Internet of Things.

CONDITION MONITORING

This real-time monitoring and **failure alert solution** provides better control for the test equipment tools.

DATA ANALYTICS

Through **data analytics** predictive maintenance will be possible to get better service for maintenance.

INFORMATION DOCUMENTATION

Customers are now able to gain more information from and during testing and can compare and analyse vividly.

REMOTE SUPPORT

Remote maintenance for our customers. If a failure occurs, TEST-FUCHS technician gets notified and can **help via remote service**.

Cloud Service

The Technology Behind

-  **Internet of Things (IoT)**
-  **Cloud-Based Web Platform**
-  **Analytics**

Data Solutions uses the Internet of Things (IoT) and Big Data to connect, monitor and interact with the aeronautical world.

These new technologies, dedicated to interaction with objects and processing of large amounts of data, provide reliability, performance and saves costs.
