

## Nitrogen Filling Equipment

### >SFE300<

Hand-held unit to top up nitrogen-filled actuators in aircrafts

- > TÜV-approval
- > Portable due to light weight construction
- > Output pressure adjustable (2 to 280bar)
- > Safety valve 300bar
- > Flow controllable
- > Filling device to refill the bottle

## GENERAL INFORMATION

- > 3/2-way fill valve
- > Fill hose 2m with Schrader valve
- > Tool bag

## TECHNICAL DATA

<b>&gt; Pneumatic parameters:</b>			<b>&gt; Dimensions and weight:</b>	
Nitrogen circuit	Pressure	max. 300bar	L x W x H	650 mm x 300 mm x 510 mm
	Bottle	6.8 Litre	Weight	approx. 22 kg
	Medium	Nitrogen		
	Pressure regulator	2 to 280bar	<b>&gt; Ambient conditions:</b>	
	In-/output pressure gauge:	0 to 400bar	Operation temperature:	-10°C to 60°C
			Storage temperature:	-20°C to 60°C
			Altitude:	up to 1,000m above sea level
			Humidity:	30 to 95%
