

## ATA CHAPTER 38 - GSE

TEST-FUCHS provides you with ground support equipment for every need within ATA chapter 38. Waste line cleaning, waste tank cleaning, hot water flushing, disinfection, or even vacuum toilet blockage removal – TEST-FUCHS has a high-quality answer for your needs:

**WALICLEAN** is the new innovative method of cleaning all vacuum waste line systems:

- > NO expensive chemicals
- > NO tube removal
- > NO monitoring
- > Short cleaning time
- > FAST and EASY

**DC2** was developed for easy and comfortable disinfection of the A/C potable water system:

- > Design for in- and outdoor usage
- > Extended version for hangar & tap water supply
- > Automatic injection of hydrogen peroxide (Herisil) disinfectant into water line during filling process
- > Easy operation

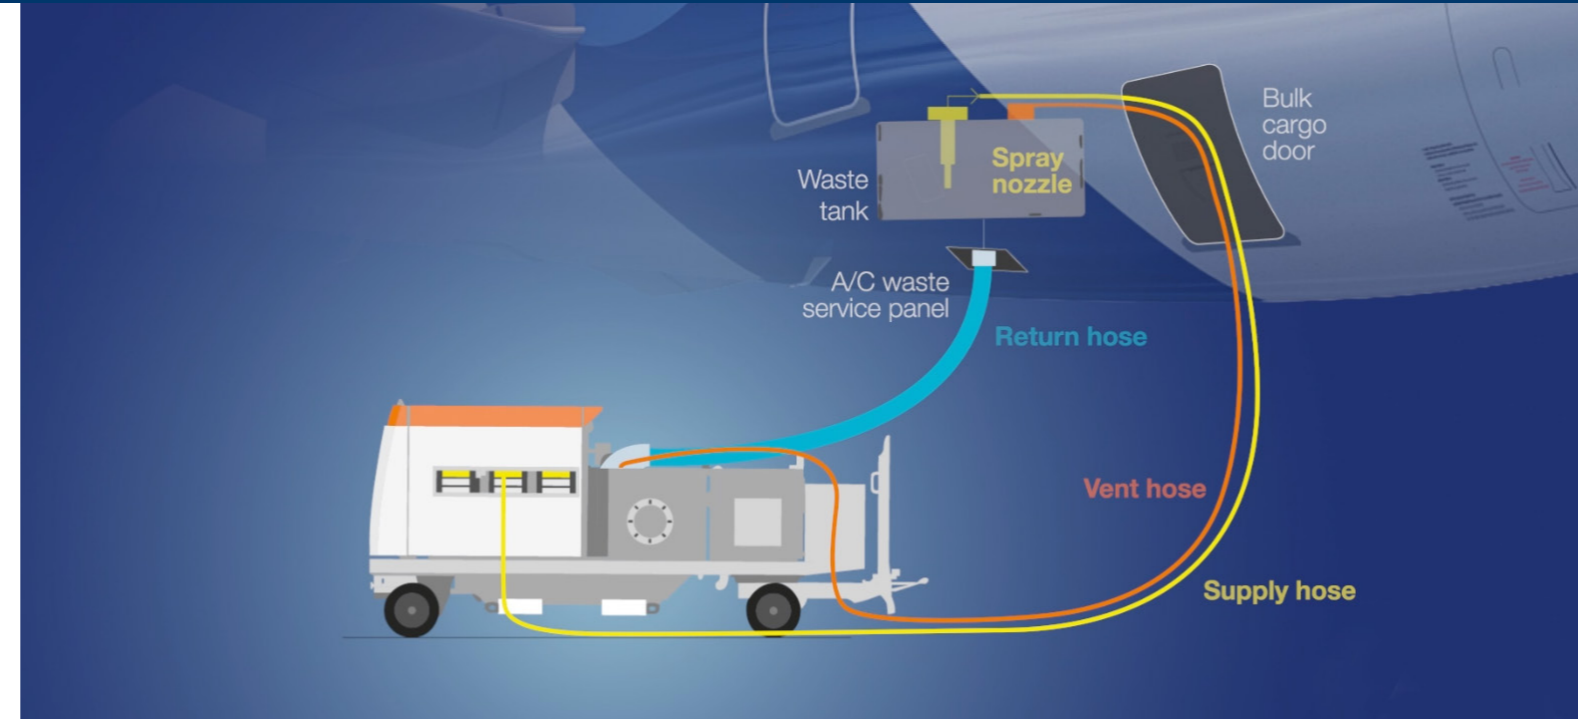

**DCT3** was developed to check fresh or waste water systems for the Airbus A320 family in terms of functionality and leak tightness:

- > Self-disinfection feature
- > Outdoor capable
- > Fresh water inlet pump
- > 12" touch monitor for modern operation

**The Vacuum Toilet Blockage Remover (VTBR2)** is the universally applicable solution to clear and remove pipeline blockage of vacuum-lavatory system

- > Fast blockage removal to avoid high AOG costs
- > Simple, manual operation
- > Autonomous due to integrated Diesel engine
- > Connection for tank drainage with Waste Service Truck

TEST-FUCHS has a global reputation for quality and innovation. More than 75 years of experience with the global players has resulted in a special relationship with our customers. TEST-FUCHS is still a family-owned company, eager to adapt to the customer's needs.

TEST-FUCHS test systems are delivered to Airlines, Original Equipment Manufacturers and Maintenance, Repair and Overhaul companies.

Our **Waste Tank Cleaning Trolley** is a result of more than 60 years of experience.

# WASTE TANK CLEANING TROLLEY - WTC1

ATA CHAPTER 38 - Water/Waste

- Autonomous cleaning process
- Sustainability (no expensive chemicals)
- IoT ready (e.g. calibration, trouble shooting)
- Usable on Airbus programs A350 and A321XLR
- FAST and EASY (two water tanks parallel automatically)

## BENEFITS

- > Electro and Diesel options
- > One or two tanks parallel
- > Included fresh water flushing
- > Work environmentally friendly
- > ATA chapter 38
- > During scheduled maintenance checks
- > Indoor or outdoor
- > IoT Ready
- > Efficient cleaning time
- > Autonomous cleaning process

## MAINTENANCE - ATA CHAPTER 38

Sustainability, autonomous processes and IoT solutions are the future of a successful and long-lasting company. **Waste Tank Cleaning Trolley (WTC1)** combines these three paths and operates additionally **fast and easy!**

Waste Tank Cleaning Trolley is the new method of cleaning waste tanks for all Airbus programs. WTC1 works **overnight**, is fully automatic and can clean **two waste tanks simultaneously**. Apply the WTC1 (electro or Diesel version) to the aircraft during a routine maintenance check.

A solution of standard citric acid and water is sprayed with 13 bars into the waste tank. Thanks to a **special turning adapter** the fluid reaches **each spot** in the tank.

The WTC1 is **environmentally friendly** and gentle on the aircraft. The WTC1 is the solution for **fast and easy** waste tank cleaning. Try this new technique and the advantages will convince you. **Avoid high costs** per year for special chemicals and working hours, while also significantly reducing maintenance and turn around times. With WTC1 it is so easy to clear your waste tank.

## WASTE TANK TROLLEY IS FAST AND EASY
