

WASTE TANK CLEANING TROLLEY

AIRBUS

USE

Developed for cleaning the vacuum waste tanks of various aircrafts

Parallel cleaning for two waste tanks or one XXL waste tank

Included fresh water flushing to avoid remaining cleaning fluid

ADVANTAGES

Fully automated cleaning process!
No monitoring required!

Environmentally friendly thanks to water and citric acid (no expensive chemicals)

Parallel to standard maintenance tasks

IoT Ready (eg calibration, trouble shooting,...)

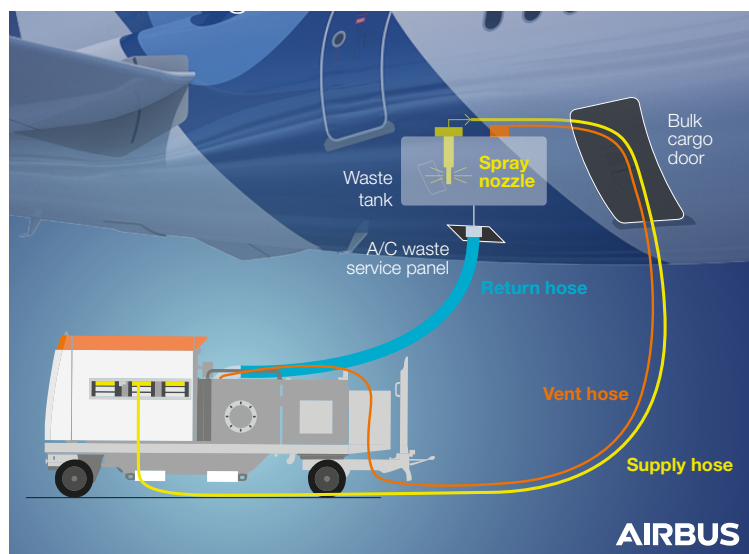

Usable for Airbus programs

CLEANING PROCESS

Apply the WTC to the aircraft during a routine maintenance check. A solution of standard citric acid and water is sprayed with 13 bars into the waste tank. Thanks to a special turning adapter the fluid reaches each spot in the tank.

WTC1 is available as electro or Diesel version (for autonomous usage).
