

# What is DATA SOLUTIONS?

DATA SOLUTIONS is a real-time data tracking service which enables our customers to harness testing data for real-time competitive advantage.

Enjoy a new digital experience. DATA SOLUTIONS and its customized applications provide you with full connectivity and delivers all the essential information for the management and maintenance of your equipment as well as UUT testing results. Reduce complexity and gain advantages through transparency and collaboration. Join us in the Internet of Things.

## The Technology Behind

**Internet of Things (IoT)**

Data Solutions uses the Internet of Things (IoT) and Big Data to connect, monitor and interact with the aeronautical world.

**Cloud-Based Web Platform**

These new technologies, dedicated to interaction with objects and processing of large amounts of data, provide reliability, performance and saves costs.

**Analytics**

**Access from anywhere**
