

TEST-FUCHS GOES GREEN FUTURE

Reforestation

(Climate)Fit in the forest: In recent years, we have conducted more than 20 reforestation and cultivation projects in our TEST-FUCHS forest. Almost 12 hectares of forest have seen biodiverse tree-planting with around 25,000 mixed forest seedlings and made fit for the climate. Numerous TEST-FUCHS employees also supported the forestry work as part of the Active@TEST-FUCHS initiative and personally lent a hand. Thank you for your efforts!

Company Bicycle

Sustainable mobility@TEST-FUCHS: The journey to work can also be undertaken sustainably. With the „Firmenradl“, TEST-FUCHS offers its employees additional motivation to leave the car at home more often, save petrol costs and do something for their health at the same time. Distinctly cold-resistant TEST-FUCHS employees brave the sub-zero temperatures and use their bikes to get to work even in winter if the road conditions are suitable.
