

**Press release**

**Gross-Siegharts / Munich, October 10, 2013**

**WALICLEAN is heading towards AIRBUS Approval**

**Our innovative waste line cleaning product, WALICLEAN, has achieved the next important milestone of its success story:**

**AIRBUS** and **TEST-FUCHS** have **signed an agreement** during the exhibition Inter Airport Europe for the AIRBUS Approval of the WALICLEAN trolley.

The aim is to include WALICLEAN in the technical publications of AIRBUS, such as their Tool and Equipment Manual (TEM) and the Aircraft Maintenance Manual (AMM) for the **A320 family, A330/340, A380 and A350XWB aircraft**.

After completion of the approval, AIRBUS customers will have the big advantage that the innovative WALICLEAN process no longer requires a personal / airline approval, as there will be a **WALICLEAN Task** included in the **AIRBUS AMM** under **Chapter 38**.
